

FRIENDS OF COMMUNITY CHOICE ENERGY

We agree:

- More competition in the energy market and a service provider focused on local needs will benefit business and residential ratepayers.
- Capturing some of the approximately \$1 billion per year that leaves Silicon Valley for electricity generation, and investing it locally will produce jobs and benefit the local economy.
- Silicon Valley's pursuit of energy efficiency, solar, and other renewable energy resources, and its technical capacity to develop them cost-effectively should be accelerated.
- Just as innovation has revolutionized telecommunications, rapid innovation is needed to create the energy system of the future – an internet of energy that is secure, decentralized, and resilient.

For the above reasons we support evaluating the suitability of Community Choice Energy.

Shiloh Ballard

Carola Barton, Financial Advisor, Raymond James

John Brosnan, Santa Clara Valley Water District

Jeff Byron, Former Commissioner, California Energy Commission

Kelley Bryant

Larry Carr, Executive VP, Joint Venture Silicon Valley, and Mayor Pro Tem, City of Morgan Hill
